ETIKA IN ODGOVORNOST

Nenehna prisotnost kriz nas opominja, da je naš življenjski prostor omejen. Spremembe v prostoru, tako naravni procesi kot človeški posegi, imajo dolgotrajne posledice, ki vplivajo na kvaliteto življenja ljudi. Naš čas zaznamuje ideologija neoliberalizma, ki temelji na individualizmu in sebičnosti, spodbuja pa tekmovalnost in pohlep. To se kaže tudi v prostoru, ki ga mnogi vidijo predvsem kot priložnost izjemnih finančnih koristi. Arhitekti modernizma so si prizadevali za drugačen, pravičnejši svet, ki bi zagotovil dostojne življenjske pogoje vsem, ne le privilegirani eliti. Njihova arhitektura je bila zato sinonim optimizma, solidarnosti in vsesplošnega napredka, medtem ko postaja sodobna arhitektura materialni izraz vse večje neenakosti. Drastičen padec ugleda arhitekturne stroke v zadnjih desetletjih je zato razumljiv. Umetnost in arhitektura sta danes bolj pomembni, kot sta bili kadarkoli. Vendar le tedaj, ko se z etično držo postavita po robu miselnosti, ki postavlja profit pred ljudi.

ETHICS AND RESPONSIBILITY

A constant presence in our lives, crises serve as a reminder that there are limits to our living environment. Changes in space, both as natural processes and as human interventions, carry long-term consequences impacting the quality of people's lives. The ideology of neoliberalism, founded on individualism and selfishness while promoting competition and greed, is the mark of our time. As much is also reflected in space, seen by many as an opportunity for extraordinary financial gain first and foremost. The architects of Modernism strove for a different, more just world that would ensure decent living conditions for everyone, not just for the privileged elite. As a result, their architecture was a synonym for optimism, solidarity, and universal progress, while contemporary architecture is shaping to be a material expression of the increasing inequality. The drastic loss of respect suffered by the architectural profession in recent decades is therefore understandable. Art and architecture are more important today than they have ever been before. But only when they adopt an ethical stance to challenge the mentality which puts profit before people.
